# **ECONOMIC IMPACT OF WISCONSIN'S** INLAND WATERWAYS

IN 2018, WISCONSIN'S PORTS, INLAND WATERWAYS, AND INLAND WATERWAYS-DEPENDENT INDUSTRIES SUPPORTED

**Nearly** 235,000 jobs

\$14.1 billion in personal income

\$22.4 billion in Gross State Product

\$49.4 billion in total output

...Giving rise to \$1.1 billion in state & local

tax revenue

#### INLAND WATERWAYS SUPPORT WISCONSIN'S KEY INDUSTRIES

**Percent of Goods** Direct **Industry Sub-Category** Shipped by Water (Tons) Wisconsin Jobs C 25.5% of inbound **Nondurable Manufacturing** 33.400 Construction **8.3%** of inbound 66,600

**TOP INLAND WATERWAYS COMMODITIES BY WEIGHT** (comprising 83% of total tonnage)

Food & food **products**, such as fruits, vegetables, oils, & seeds million tons

Coal, lignite, and coal coke

803 thousand tons

189 thousand tons

**TOP INLAND WATERWAYS COMMODITIES BY VALUE** 

(comprising 42% of total value)

Machinery, \$683,9 including appliances & industrial million equipment

\$432.8 billion

Electronics, including motors, transformers, and conductors

\$376.8 million

Wisconsin has nearly of navigable inland waterways, ranking it th in the nation

### WISCONSIN'S INLAND WATERWAY ASSETS AT A GLANCE

public

In 2018, tons of freiaht valued at

\$3.6 BILLION

moved on Wisconsin's inland waterways, which is equivalent to

**74,000 TRUCKS** 

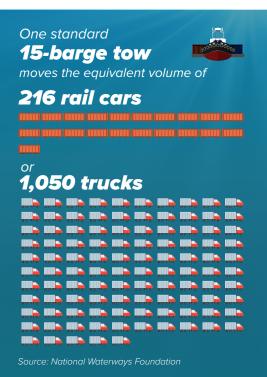

Avoided trucks translates into reduced congestion, emissions, and crashes, and contributes to the state of good repair of highway infrastructure

#### BENEFITS OF INLAND WATERWAYS TRANSPORTATION

America's inland waterways system is vital to our nation's competitiveness and economic growth. The inland waterways efficiently, sustainably, cost-effectively and safely transport critical commodities like agricultural goods, energy products, building materials and industrial chemicals to destinations within the U.S. and to deep water ports for export. In 2018, 766.3 million tons of goods valued at \$507.3 billion moved on the U.S. inland waterways system, and by 2045 it is expected to increase by 23% to 942 million tons valued at \$871 billion. Barge transportation is the safest, most environmentally-friendly, economical, and fuel-efficient way to move our nation's goods for use domestically and for export. On a single gallon of fuel, one barge can move freight more than four times farther than trucks, releasing 10 times fewer emissions.

Called "the backbone of the transportation logistics system," the inland waterways are a key part of the United States' transportation supply chain. The system includes a vast network of 12,000 miles of connecting waterways and 218 locks. However, the majority of locks and dams on the Mississippi River system were constructed during the 1930s and are operating well beyond their 50-year design life. Modernizing the nation's inland waterways system will support and create American jobs, increase U.S. exports, and inject billions of dollars into the U.S. economy to power our growth for the next 50 years.

Over the next 10 years, constructing all authorized navigation projects and rehabilitating existing locks could have significant national impacts, leading to a 20% increase in jobs, 39% increase in Gross Domestic Product, and 40% increase in output

The US' inland waterways system saves between

# \$7 billion & \$9 billion

annually over the cost of other modes due to efficiency and low cost

Source: USDA

The National Waterways Foundation estimates overall investment needs of inland waterways at

\$8 billion over the next 10 years

the smallest carbon footprint among freight transportation modes

**Barges have** 

Tons of CO2 per Million Ton-Miles

Compared to barges, moving an identical amount of cargo by rail generates 30% more emissions, while trucks generate 1,000% more emissions.
